KICKER ROCK

Kicker Rock The Paradise for Snorkeling

Today our adventure begins at the Baquerizo Moreno Dock early in the morning. We are going to be by the hand of our bilingual guide, who will help us board the zodiac that will take us to the Galapagos Hopper catamaran. **We will navigate the west side of San Cristobal Island**, so we will be able to watch frigate birds and the unique marine iguanas. With a little luck we will be able to spot manta rays and dolphins jumping amongst the sea alongside with other marine wildlife.

Our first snorkeling excursion will take place at **Kicker Rock** also known as the sleeping lion. This astonishing rock is a tuff cone eroded into twin peaks. There is

vast wildlife living in its surroundings, it's cliffs are home to blue footed boobies and other sea birds. In terms of marine life some of the species that we can find at this place are sea lions, reef fish, rays, hammerhead shark, sea turtles and much more.

For lunch we will board again the Galapagos Hopper and will enjoy a succulent 3 course meal. Also here, we will be served with soft drinks, coffee, tea and infusions.

After enjoying Kicker Rock, we will disembark at the beach where we can walk in search of coastal birds and sea lions, or relax and take a sunbath.

If we chose the option of discovering the shore by foot, we can see mangrove forests. Later we can dip into the turquoise water before returning to the Galapagos Hopper catamaran for our navigation back to Baquerizo Moreno Dock in the afternoon.
