

PUNTA PITT - DAY TOUR

DEPARTURES EVERY MONDAY

SNORKELING IN
PUNTA PITT

Punta Pitt The Land of the Boobies

Today our adventure begins at the Baquerizo Moreno Dock early in the morning. We are going to be by the hand of our bilingual guide, who is going to help us to board the zodiac that will take us to the Galapagos Hopper Catamaran. Our navigation will last approximately 2h15 minutes.

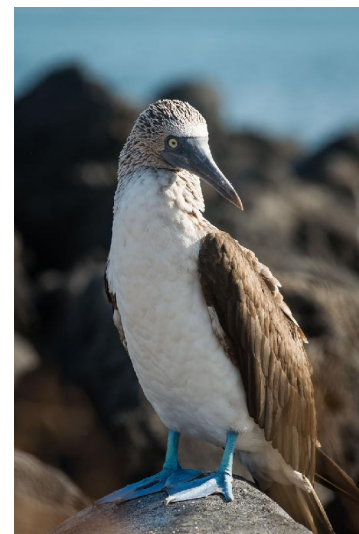

The fun starts with a wet landing at the **Golden Sand Beach** (Playa Arena Dorada). **Punta Pitt is an eroded volcano**, it is one of the few places in Galapagos where we can spot the three species of boobies, the blue and red-footed boobies and the Nazca boobies.

The excursion at Punta Pitt is on rocky terrain, so we should be

prepared for the two hours hiking with comfortable shoes to avoid any inconvenience and being able to enjoy this unique landscape.

After hiking around the site, we will be able to do snorkeling at the Pitt Islet. Thus, we will watch an amazing variety of fishes, and with luck we will snorkel among sharks.

As soon as we board again the Galapagos Hopper Catamaran, we will be received with a refreshing and delicious snack, and for lunch we will enjoy a three course meal. Also, we will have soft drinks, coffee, tea and infusions available aboard.

PRICE P/PERS = \$211
Net Rate
